Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas on Stomach, Etc.

Indigestion and practically all

Indigestion and pfactically all forms of stomach trouble, say medical authorities, are due nine times out of ten to an excess of hydrochloric acid in the stomach. Chronic "acid stomach" is exceedingly dangerous and sufferers should do either one or two things.

Either they can go on a limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to excess acid secretion or they can eat as they please in reason and make it a practice to countries the effect of the harmful acid and brevent the formation of gas, soutness or premature fermentation by the use of a little Blaurated Magnesia at their meals.

There is probably no better, safer or more reliable stomach antiacid than Blaurated Magnesia and it is widely used for this purpose. It has no direct action on the stomach and is not a digostant. But a teaspoonful of the powder or a couple of five grain tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the trouble and the meal digests naturally and healthfully without need of pepsin pills or artificial digestiants.

Get a few ounces of Bisurated Magnesia from any reliable druggist. Ask for either powder or tablets. It never comes as a liquid, milk or cl' atte and in the bisurated form is not a isxative. The best advice you ever had on "what to eat."

The Removal of a bottle of Mando. Use it as directed pottle of Mando.

DIE OF PNEUMONIA

Private James W. Geddes, twentyfive years old, who narrowly escaped death many times when German airplanes bombed his post, has succumbed to pneumonia in France. His mother, Mrs. Catherine Geddes, of 1312 North Carolina avenue northeast, has received a telegram from the War Department saying that her son died on October 6. His name is in the casualty list for today. Geddes, a Business High School araduate and an employe of the Pension Office, entered the service last April and was sent to Camp Meade,

as a member of the 112th Engineers. He recently wrote to his mother from

"I was near a hospital and that was their target. I hugged the wall and saw the two glass additions to

the hospital reduced to ruins by the Huns. My pal had shrapnel shot into

Unlike Topsy-Swift & Company Has Not "Jest Growed"

Swift & Company, in fifty years of well ordered growth, has become one of the great national services because it has learned to do something for the American people which they needed to have done for them, in the way in which they preferred to have it done.

It has met each successive demand, in the changing conditions of national life, by getting good meat to increasing millions effectively, efficiently, economically, and expeditiously.

The Swift & Company packing plants, refrigerator cars, car routes, branch houses, organization, and personnel of today are the practical solutions, born of practical experience, to the food problems of a half a century.

Because of all of these elements working in correlation and unison, Swift & Company is able to supply more and better meat to more people than would have been possible otherwise, at a net profit per pound of meat so low (a fraction of a cent) that the consumer price is practically unaffected.

Strip away any portion of this vast, smooth-running human machine, and you make a large part of the meat supply uncertain, lose the benefit of half a century of fruitful experience, and scatter the intelligent energies of men who have devoted a life work toward meeting the needs of a nation in one vital field.

The booklet of preceding chapters in this story of the packing industry will be mailed on request to Swift & Company, Union Stock Yards, Chicago, Illinois.
